

Development of Windows Desktop Software

Granber Solutions has extensive experience developing Microsoft Windows based software programs for the desktop.

Desktop software is software that runs locally on your own Windows XP, Windows Vista or Windows 2000 computer. When a network connection or a web server is not readily available, or when you need the data to be portable, desktop software may be the best way to place computing power in your user's hands.

Our developers have been creating commercial Geoscience based desktop applications for over fourteen years. We utilize the latest GUI tool libraries to create stunning applications. Our areas of expertise include:

- Data Driven Applications
- Scientific Graphing Development
- Innovate User Interface Designs
- GIS Algorithm Implementation
- Image Processing Algorithms

We have extensive experience with the following tools and technologies:

- Visual Studio 2005 & Visual Studio 2008
- .NET 2.0, 3.0, 3.5
- Microsoft C++ and C#
- Microsoft Access
- Windows Forms
- MFC
- STL
- GDI and GDI+
- Nevron .NET Vision Library
- ADO.NET
- Prof-UIS GUI Library
- Developer Express Components
- Stingray Objective Grid
- CodeJock GUI Library
- InstallShield & Wise setup software
- Visual Assist
