

**A library for dynamic generation of PDF documents from Java
and .NET**

PDFjet is Your Best Option for Web Based Reporting. Why?

- Leverage the precision of PDF. Reports and forms look just as you designed them.
- Royalty-free licensing for server or workstation applications.
- Easy to learn 100% Object-Oriented API saves development time.
- Generate PDF documents and reports using a single library across platforms and languages.
- Solid International and Unicode Support.
- High level components for common tasks including multi-page reports, charting and flexible column formatting let you focus on the needs of your users - instead of on the low level technical details.
- Built-in support for Code 39, Code 128, UPC and PDF417 barcodes let you avoid barcode fonts licensing issues.
- The basic PDF library is available under a BSD-style Open Source License.
- Version of PDFjet for Java that is compatible with the Google App Engine is available.
- See the full benefits of PDFjet for Java and PDFjet for .NET.
