

## Software Development for the Geosciences

Granber Solutions is a highly skilled developer of software applications on all major platforms - web, desktop and mobile. With a seasoned programming and project management team, we are second to none among software development companies.

We add value to your business by delivering solutions to data handling challenges for the natural resources industries. We know the science of geology, and we know the business of prospecting, drilling, and environmental evaluation.

We are a Microsoft Partner and we can provide solutions using Microsoft technologies, or using open source tools - your choice.

### Complete Turnkey Solutions

Granber Solutions provides expert project management and a highly skilled software development staff that is accomplished in current software development techniques. We assume full responsibility for all software projects that we take on.

In short, you do *not* have to worry about managing a software project to use our services. Contract your project to us and we will make your solution *just happen* - on time and on budget.
